

# FLAT GLASS TRAINING

## COURSE OVERVIEW:

This focused 1-day training is designed to introduce participants to the fundamentals of architectural window film installation for residential and commercial buildings. Ideal for professionals looking to expand into flat glass applications, this hands-on course covers the essential techniques, tools, and practices for high-quality film installation on flat glass surfaces. Includes course materials, tools, and certificate of completion.

## *What You Will Learn:*

- ✓ Introduction to architectural window films (solar control, privacy, safety, decorative)
- ✓ Tools and materials used in flat glass film installation
- ✓ Proper glass surface preparation techniques
- ✓ Film measuring, cutting, and application methods
- ✓ Avoiding common issues during installation
- ✓ Overcoming objections, role play & best practices
